PROFILE

As an aspiring Full Stack Developer, I bring a strong foundation in Django, React, and AWS EC2. My practical experience includes developing a task management app, an Instagram Lite clone, and an e-commerce platform. I thrive on continuous learning and adaptability, making me an ideal fit for dynamic tech teams.

EXPERIENCE

Personal Projects

A Portfolio Website, (React js)

Designed and built a portfolio website using React js

A Simple Todo Web App, (React js & Django Rest Framework)

- Developed a task management application using Django rest api (backend) and React (frontend).
- Implemented features like task creation, due dates, and task completion.
- Utilized RESTful APIs for communication.

E-commerce Platform, (Django Rest Framework)

- Designed and built an e-commerce backend.
- Integrated product listings, shopping cart functionality, and user reviews.

Instagram Lite Clone, (React js & Django Rest Framework)

- Created a lightweight version of Instagram using React and Django Rest Framework.
- Implemented user authentication, photo uploads, and basic social features.
- Focused on performance optimization.
